## INSTRUCTIONS

1. Fill in the Family Group Sheets with the information you know about your family. Data you know is accurate enter in ink, data of which you are unsure enter in pencil. Pencil is recommended for all early work.
2. Please list wives by their maiden name only.
3. Please list dates with names of months, not numbers. (Genealogists list by day, month, year other folks do not, this can sometimes lead to errors if the name of the month is not entered).
4. Start a new sheet for each family. Use full names, list nicknames to the side. If more than one marriage, make a group sheet for each marriage. In Place area list village (town, city), County and State. Country if foreign born.
